Summary

Transocean continues to build a strong operational momentum, driven by higher rig utilization, rising revenue efficiency, and a \$6.7 billion backlog securing 2026 visibility. Its deleveraging progress, with \$1.2 billion in debt reduction and lower interest costs, strengthens liquidity. The company's leadership in high-spec rigs and disciplined cost control further enhance resilience. However, total debt remains high at \$5.9 billion, weighing on cash flows amid refinancing risks. Asset impairments signal fleet aging, and profitability remains uneven due to cyclical swings and one-offs. Contract transition risks with heavy oil-price dependence could lead to reduced revenue contribution adding volatility to the company's outlook. The improving fundamentals against structural financial and market headwinds justifies a Neutral stance.

Overview

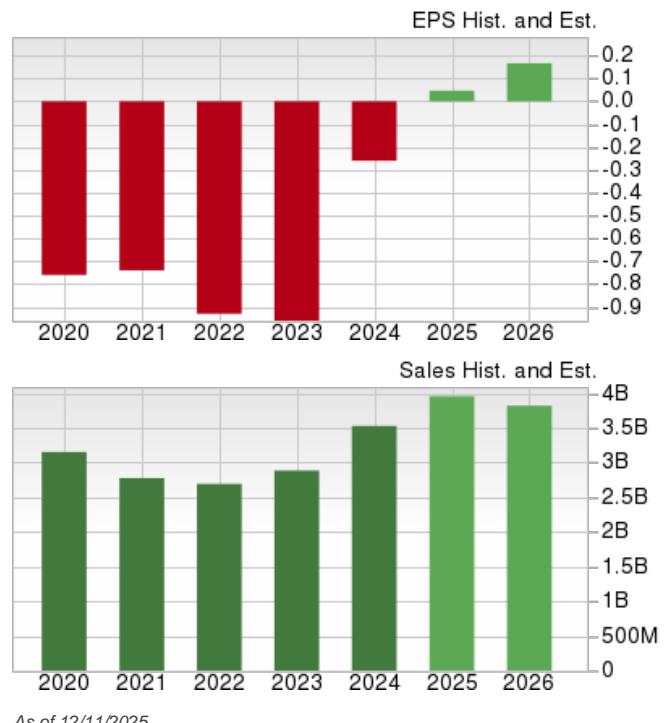

Switzerland-based Transocean, Inc. is the world's largest offshore drilling contractor and leading provider of drilling management services. The company provides rigs on a contractual basis to explore and develop oil and gas. Transocean offers offshore drilling rigs, equipment, services and manpower to exploration and production companies worldwide. As of Oct 29, 2025, the company owned or had partial interests in 27 mobile offshore drilling units, comprising 20 ultra-deepwater floaters and seven harsh environment floaters.

Transocean's fleet is considered one of the most modern and versatile in the world due to its emphasis on technically demanding segments of the offshore drilling business. Transocean's fleet can be broadly divided into two distinct groups based on drilling capabilities: ultra-deepwater floaters and harsh environment floaters, which accounted for 67.7% and 32.3%, respectively, of its contract drilling revenue for Sept 30, 2025.

Transocean's ultra-deepwater floaters are capable of drilling in water depths of 4,500 feet and more. The company's harsh environment floaters are capable of drilling in harsh environment at water depths between 1,500 and 10,000 feet with greater displacement.

Transocean maintains an expansive global footprint with active operations in the U.S. Gulf of Mexico, Brazil, West Africa, the North Sea, Australia, and Southeast Asia. Its rigs are strategically deployed in high-demand regions supported by long-cycle offshore developments. This global presence not only supports revenue diversification but also gives the company a competitive edge in bidding on multi-year tenders across both emerging and mature markets.

In 2024, Transocean acquired the remaining 67% ownership in Orion Holdings for \$431 million through shares and senior notes, making Transocean Norge a wholly owned subsidiary.

As of 12/11/2025

Reasons To Buy:

- ▲ Transocean's third-quarter 2025 results highlight a company riding a strong momentum wave. The company's contract drilling revenues demonstrated an upward trend both sequentially and year over year, supported by higher rig utilization and an impressive 97.5% revenue efficiency. This improvement demonstrates better fleet deployment and operational execution. Sustained utilization momentum in both ultra-deepwater (71%) and harsh environment floaters (90.6%) positions Transocean to capitalize on recovering offshore demand and rising dayrates, signaling expanding cash generation capacity ahead. Our model predicts that Transocean's contract drilling revenues will be over \$3.95 billion for the full year 2025 - up 12% over 2024.
- ▲ Transocean held a solid \$6.7 billion backlog as of Oct 2025 — With approximately 89% of 2026 revenues already tied to firm contracts. This solid book of business provides revenue visibility over multiple years and protects cash flows amid market volatility. The backlog's quality — anchored in high-spec floaters and reputable clients like BP and Petrobras — offers downside protection and positions Transocean for long-term earnings stability and potential margin expansion as new contracts roll in at higher rates.
- ▲ Transocean has made significant progress in fortifying its balance sheet through disciplined deleveraging initiatives. The company reduced total debt by approximately \$1.2 billion—surpassing its scheduled maturities of \$714 million—and simultaneously lowered annual interest expenses by about \$87 million. This was achieved through a combination of equity and debt market transactions, refinancing, and early retirement of high-cost notes. The stronger capital structure enhances liquidity, improves debt maturity alignment, and allows the company to fund future obligations from operational cash flow, reducing dependence on capital markets and mitigating dilution risk for shareholders.
- ▲ Transocean's dominance in the ultra-deepwater and harsh-environment drilling segment, with 27 high-specification floaters ((20 ultra-deepwater and 7 harsh environment), reinforces its position as the industry's technological leader. Its advanced rigs are equipped to operate in the most challenging offshore conditions, securing premium dayrates and long-term contracts from top-tier clients. Its focus on seventh and eighth-generation rigs—like the record-setting Deepwater Titan, provides a competitive moat against peers. As offshore investment accelerates, Transocean's unmatched technical reliability and operational excellence position it to command strong pricing power and superior cash flow visibility.
- ▲ Transocean continues to demonstrate prudent financial discipline through its focused cost-reduction and efficiency initiatives. The company's shore-based reorganization and deferred maintenance optimization have effectively lowered operating expenses without compromising service quality or uptime. Capital expenditures remain tightly managed, coming in below guidance, reflecting operational efficiency and timing benefits. With robust liquidity of \$1.8 billion at quarter-end, Transocean is strategically positioned to channel free cash flow toward accelerated debt repayment or selective reinvestment in high-return fleet upgrades and modernization programs.
- ▲ Transocean is well-positioned to capitalize on a strengthening offshore drilling cycle, with management projecting rig demand to rise about 10% over the next 18 months, supported by active tenders across Brazil, Africa, and Asia. As reserve-to-production ratios tighten, oil majors are set to boost exploration spending, driving higher utilization and day rates. With deepwater activity expected to exceed 90% utilization by 2027–2028, Transocean's premium fleet and strong customer relationships offer substantial leverage to a sustained multi-year industry upcycle.

Transocean's \$6.7 billion backlog provides revenue visibility over multiple years and protects cash flows

Reasons To Sell:

- ▼ Despite active deleveraging efforts, Transocean remains highly leveraged with approximately \$5.9 billion in total debt at the end of the third quarter of 2025. Quarterly interest costs of about \$140 million continue to strain operating cash flows, limiting financial flexibility for growth initiatives. Although management targets a \$1.2 billion reduction by year-end, elevated interest rates and refinancing risks could offset progress. Any shortfall in debt repayment or deterioration in credit conditions may pressure liquidity, weaken balance-sheet strength, and restrict the company's ability to fund capital expenditures or pursue future strategic opportunities.
- ▼ Transocean's property and equipment fell to \$12.7 billion (net) from \$15.8 billion at the end of 2024 — a \$3.1 billion decline driven by impairments and depreciation. This accelerated asset write-down underscores aging fleet concerns and potential competitive disadvantage versus newer, more efficient rigs entering the market. Upgrades or replacements will require significant future capital outlays to stay technologically relevant.
- ▼ Transocean's business is heavily dependent on oil prices and capital expenditure decisions by exploration and production (E&P) companies. A sustained downturn in oil prices or reduced offshore investment could lead to contract cancellations, project delays, or lower day rates. Macroeconomic uncertainties, including recession risks and energy transition pressures, add further volatility to the outlook.
- ▼ Despite posting adjusted net income of \$62 million, the company has struggled to generate consistent profitability. Cyclical earnings swings, driven by debt refinancing and impairment timing, limit visibility for investors. Transocean's dependence on non-recurring adjustments masks underlying performance variability and makes true earnings power harder to assess amid fluctuating offshore drilling demand.
- ▼ Transocean's decision to retire nine aging rigs, including four announced this quarter, reflects its strategy to maintain a leaner, higher-spec fleet aligned with evolving customer needs. While this modernization strengthens long-term competitiveness and market positioning, it may lead to near-term asset impairment charges, disposal expenses, and reduced revenue contribution from older units. Additionally, the removal of these assets could limit flexibility to quickly capture upside opportunities if offshore demand accelerates faster than anticipated.
- ▼ Transocean faces potential execution and transition risks as several key rigs, including the Deepwater Skyros and Mykonos, approach contract completion in early 2026. While management remains confident in securing follow-on work, even short gaps between contracts could result in idle time, mobilization expenses, or acceptance of lower-margin short-term projects to maintain utilization. Given the competitive tendering environment and regional scheduling complexities, any delay in re-contracting or project commencement could temporarily disrupt revenue flow and impact overall fleet efficiency.

A sustained downturn in oil prices or reduced offshore investment could lead to contract cancellations, project delays, or lower day rates.

Last Earnings Report

Transocean Q3 Earnings & Sales Surpass Estimates

Transocean reported third-quarter 2025 adjusted earnings of 6 cents per share, beating the Zacks Consensus Estimate of 4 cents. The bottom line also improved from the year-ago period's breakeven earnings. This improvement can be attributed to a strong third-quarter result from the company's segments.

This Switzerland-based offshore drilling powerhouse's total adjusted revenues of \$1 billion beat the Zacks Consensus Estimate by \$21 million. The top line also increased 8.4% from the prior-year figure of \$948 million. This was fueled by higher revenues associated with improved rig utilization, improved revenue efficiency and an increase in day rate for one rig. Ultra-deepwater and harsh environment revenues beat the consensus mark of \$684 million and \$265 million, respectively.

Segmental Revenue Breakup

Transocean's ultra-deepwater floaters contributed 67.7% to net contract drilling revenues, while harsh environment floaters accounted for the remaining 32.3%.

Revenues from the ultra-deepwater and harsh environment floaters totaled \$696 million and \$332 million, respectively, compared with the year-ago quarter's reported figures of \$668 million and \$280 million.

Revenues from ultra-deepwater operations were down from the model estimate of \$733.9 million, while those from harsh environment operations exceeded the prediction of \$269.1 million. Revenue efficiency was 97.5%, up from 96.6% in the previous quarter and also from 94.5% reported in the year-ago quarter.

Day Rates, Utilization & Backlog

Average day rates in the reported quarter increased to \$462,300 from \$436,800 in the year-ago quarter. However, the figure beat the Zacks Consensus Estimate of \$450,000.

Average revenues per day from ultra-deepwater floaters increased to \$460,200 from \$426,700 in the year-ago quarter. The same from harsh environment floaters also increased to \$467,100 from \$464,900 in the prior-year quarter.

Fleet utilization rate was 76% in the quarter, which increased from the prior-year period's 63.9%.

As of October 2025, Transocean's total backlog was \$6.7 billion.

Costs, Capex & Balance Sheet

Transocean reported \$791 million in costs and expenses, which was 1.1% lower than the year-ago quarter's level of \$800 million. However, operations and maintenance costs increased to \$584 million from \$563 million a year ago.

The oil and gas drilling company spent \$11 million on capital investments in the third quarter. Cash provided by operating activities was \$246 million. Cash and cash equivalents were \$833 million as of Sept. 30, 2025. Long-term debt amounted to \$4.8 billion, with a debt-to-capitalization of 37.5% as of the same period.

Q4, 2025 & Preliminary 2026 Guidance

For the fourth quarter of 2025, the company expects contract drilling revenues between \$1.03 billion and \$1.05 billion, including \$60 million to \$70 million from additional services and reimbursable expenses. This outlook assumes a fleet-wide revenue efficiency of 96.5%. Operating and maintenance expenses are predicted to range from \$595 million to \$615 million. General and administrative expenses are expected to be between \$45 million and \$50 million.

Net cash interest expense is anticipated to be approximately \$122 million, indicating \$131 million in interest expense and \$9 million in interest income. Capital expenditures are estimated at \$25 million to \$30 million and cash taxes paid are expected to total around \$18 million.

For the full year 2025, the company expects that its total liquidity will be slightly more than \$1.4 billion, which includes \$510 million capacity of an undrawn credit facility. The remaining debt and capital lease balance is predicted at approximately \$5.9 billion.

For the full year 2026, RIG's preliminary contract drilling revenues are expected to be between \$3.8 billion and \$3.95 billion, which includes \$230 million to \$270 million from additional services and reimbursables. Operating and maintenance expenses are predicted at \$2.275 billion to \$2.4 billion, while G&A expenses are expected to range from \$170 million to \$180 million. RIG's cash interest expense is anticipated to be about \$480 million.

Transocean Bags \$130M Deal for Deepwater Skyros in Australia

On December 8, Transocean announced the signing of a major contract for its Deepwater Skyros drillship in Australia. This six-well contract, awarded by an undisclosed operator, is set to begin in the first quarter of 2027 and spans an estimated 320-day campaign. The contract contributes approximately \$130 million to Transocean's backlog, excluding the compensation for mobilization and demobilization.

Valuation

Transocean shares are up 35.2% in the past six months and 10.2% over the trailing 12-month period. Stocks in the Zacks sub-industry and the Zacks Oil-Energy sector are up 18.3% and 7% in the six-month period, respectively. Over the past year, the Zacks sub-industry and sector are down 6.9% and up 5.2%, respectively.

The S&P 500 index is up 16.7% in the six-month period and 16.1% in the past year.

The stock is currently trading at 2.74X trailing 12-month EV/EBITDA, which compares to 4.94X for the Zacks sub-industry, 5.52X for the Zacks sector and 18.77X for the S&P 500 index.

Over the past five years, the stock has traded as high as 36.36X and as low as 2.36X, with a 5-year median of 12.67X. Our Neutral recommendation indicates that the stock will perform in-line with the market. Our \$5.50 price target reflects 1.50X F12M sales.

Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	B
Growth Score	A
Momentum Score	D
VGM Score	A

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.

Disclosures

This report contains independent commentary to be used for informational purposes only. The analysts contributing to this report do not hold any shares of this stock. The analysts contributing to this report do not serve on the board of the company that issued this stock. The EPS and revenue forecasts are the Zacks Consensus estimates, unless otherwise indicated in the report's first-page footnote. Additionally, the analysts contributing to this report certify that the views expressed herein accurately reflect the analysts' personal views as to the subject securities and issuers. ZIR certifies that no part of the analysts' compensation was, is, or will be, directly or indirectly, related to the specific recommendation or views expressed by the analyst in the report.

Additional information on the securities mentioned in this report is available upon request. This report is based on data obtained from sources we believe to be reliable, but is not guaranteed as to accuracy and does not purport to be complete. Any opinions expressed herein are subject to change.

ZIR is not an investment advisor and the report should not be construed as advice designed to meet the particular investment needs of any investor. Prior to making any investment decision, you are advised to consult with your broker, investment advisor, or other appropriate tax or financial professional to determine the suitability of any investment. This report and others like it are published regularly and not in response to episodic market activity or events affecting the securities industry.

This report is not to be construed as an offer or the solicitation of an offer to buy or sell the securities herein mentioned. ZIR or its officers, employees or customers may have a position long or short in the securities mentioned and buy or sell the securities from time to time. ZIR is not a broker-dealer. ZIR may enter into arms-length agreements with broker-dealers to provide this research to their clients. Zacks and its staff are not involved in investment banking activities for the stock issuer covered in this report.

ZIR uses the following rating system for the securities it covers. **Outperform**- ZIR expects that the subject company will outperform the broader U.S. equities markets over the next six to twelve months. **Neutral**- ZIR expects that the company will perform in line with the broader U.S. equities markets over the next six to twelve months. **Underperform**- ZIR expects the company will underperform the broader U.S. equities markets over the next six to twelve months.
